Summary

Full-Stack Developer with 8 years of coding experience and nearly 2 years of commercial experience. Currently working at Resco on React-based enterprise mobile applications used by more than 160,000 field users. Experienced with TypeScript, React, Next.js, Django, REST APIs, and PostgreSQL.

Resco

Software Developer

April 2026 – Present

- Develop and maintain the React web layer embedded in enterprise mobile applications used by more than 160,000 field users.
- Build production features with React and TypeScript and work across Power Apps, Dynamics 365, and Power Platform.
- Use Azure DevOps for development and delivery workflows within an enterprise engineering environment.

Technologies & Tools: TypeScript, React, Power Apps, Dynamics 365, Power Platform, Azure DevOps, GitHub Copilot Business, OpenAI Codex

Backbone

Full-Stack Software Developer | React, TypeScript, Django

May 2023 – October 2024

- Developed React and Next.js features for advertising dashboards, including CRUD workflows, advanced filtering, and performance improvements.
- Built Django REST APIs, optimized PostgreSQL data models, and delivered a grant management application that automated tracking and approval workflows.

Education & Certifications

- **Intelligent Technologies**, Secondary School of Electrical Engineering Zochova, Bratislava (2021–2025)
- **Electrical Technician (§ 21) & Cisco CCNA 2 & 3** (2023–2025)

Weather Monitoring Platform

Full-Stack IoT System | SvelteKit, Django REST Framework, PostgreSQL, ESP32

- Built a full-stack IoT platform with ESP32 sensors, a JWT-secured Django API, and PostgreSQL storage.
- Created a SvelteKit dashboard with interactive maps, real-time visualization, and historical analytics.
